

CITY OF SAN JOSÉ, CALIFORNIA

Councilmember Pierluigi Oliverio
Council District 6

Thank you for contacting Councilmember Oliverio's office regarding the construction of a cell phone antenna at 2180 Radio Avenue, San Jose, CA 95125. The council office has received calls of concern about the cell phone antenna, therefore, I researched the item and will share the process with you as follows.

The application for the construction of the antenna was heard at the Planning Director's Hearing on November 9, 2009. According to the San Jose Municipal Code, a Notice of Public Hearing has to be mailed to the project applicant(s), the owners of parcels of land, and residences within 500 feet of the subject property prior to the Planning Director's Hearing. I have attached a copy of the addresses that notifications were sent.

The Planning Director's Hearing is a public meeting where anyone can attend and voice their comments/questions. After the Planning Director's Hearing, the public can file an appeal within 10 days under the city's appeal process. According to the Department of Planning's records, no one filed an appeal.

To ensure that you have copies of the appropriate documents, I have attached the following items:

1. Mailing list of applicant(s), owner of parcels of land, and residents within 500 feet of the subject property on October 21, 2009
2. Statement of Exemption of environmental review according to the California Environmental Quality Act
3. Public Hearing Notice from the Planning Department
4. Architectural drawing of the antenna submitted by AT&T

For more information regarding this matter, please go to <https://www.sjpermits.org/permits/general/permitquery.asp>. You will need to use the file number SP09-061 to access the additional materials.

I hope the information provided is helpful. If you have additional questions, please contact Denelle Fedor, Chief of Staff for Councilmember Pierluigi Oliverio at 408 535-4952.
